Ceiling

Mirror

Handrail

Plinths

Soil

Classic

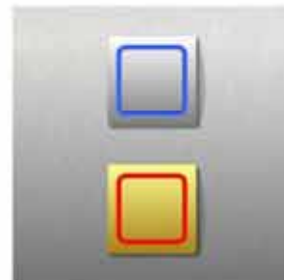

Traffic

Minimal

PUSH BUTTONS

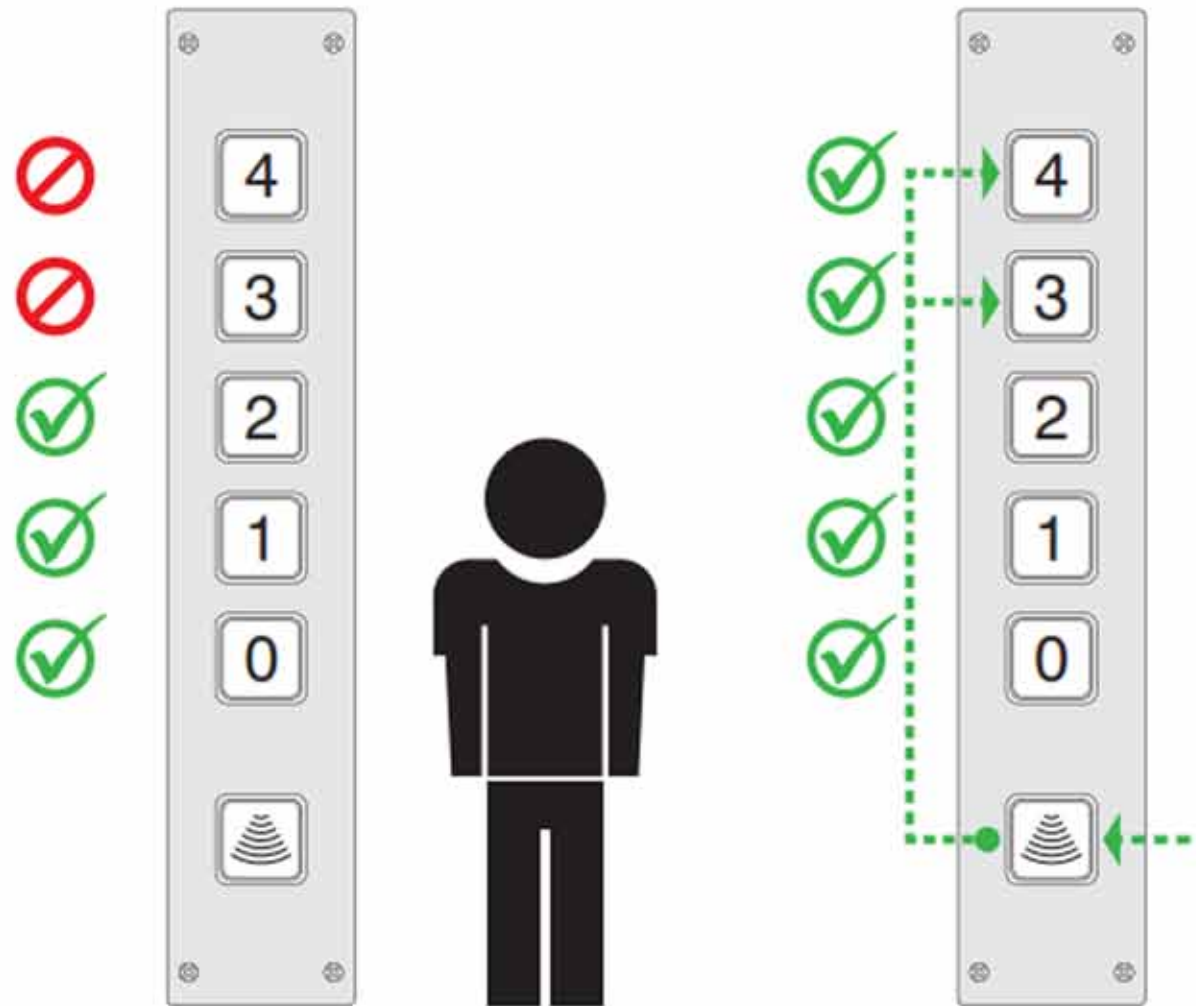

With the electronic key switch access control system, conventional keys are replaced by transponders for non-contact activation.

Installation example –

Locking of particular floors (transponders with uniform authorisation profile)

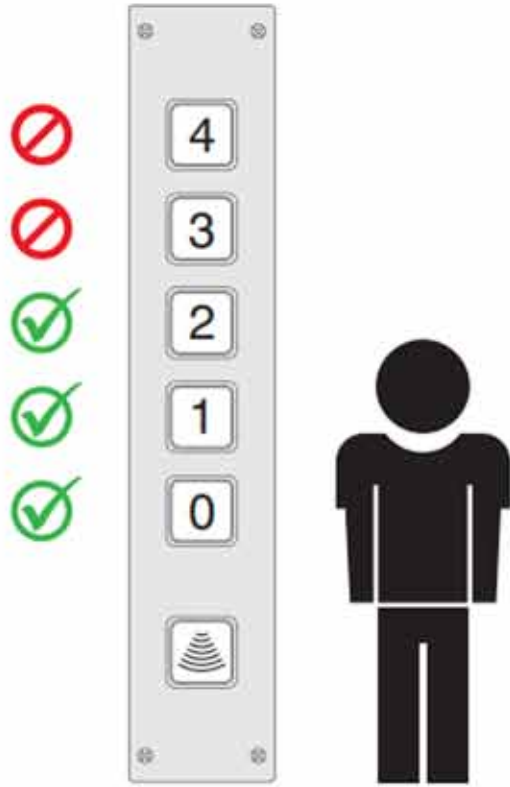

Floors 0, 1 and 2 are open to the public. No access to floors 3 and 4 without corresponding transponder.

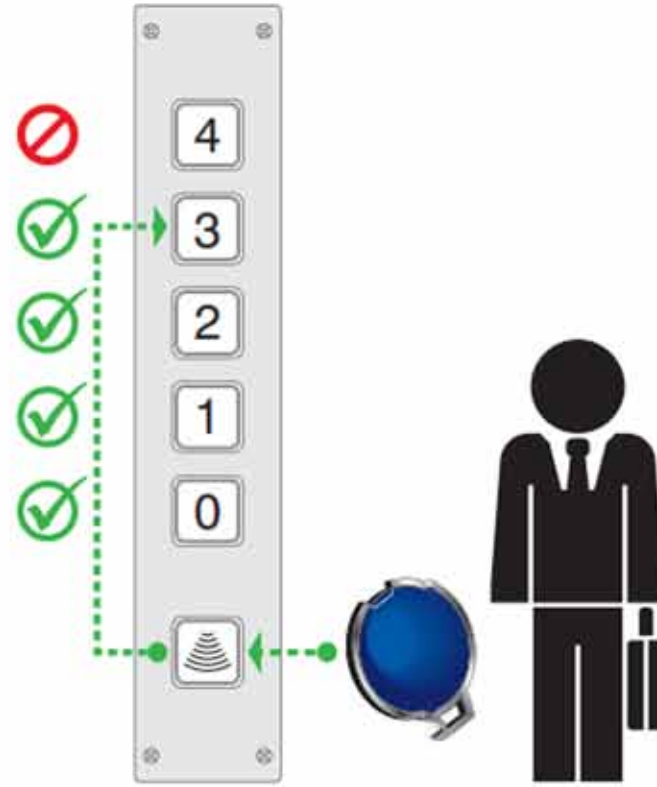

Persons with a corresponding transponder have access to floors 3 and 4.

Installation example

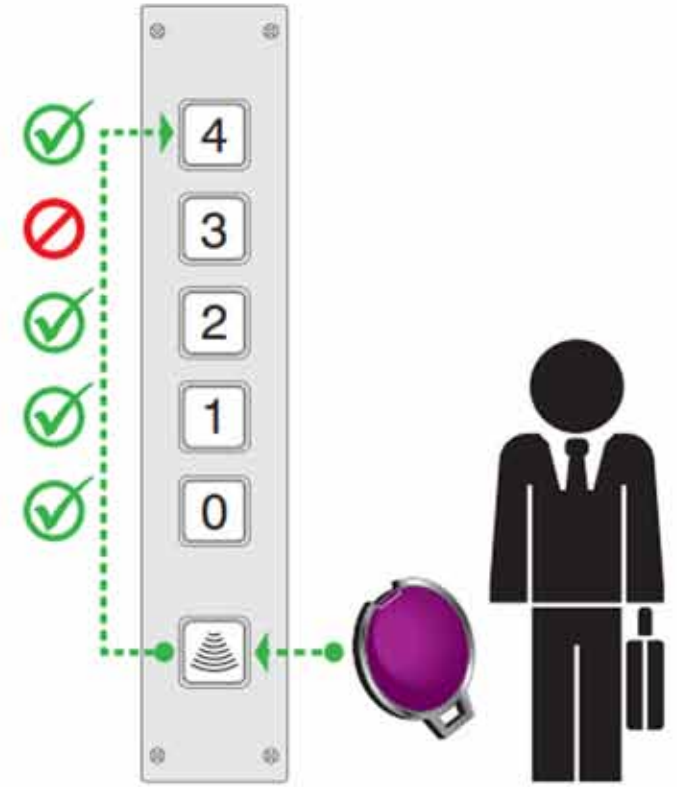

Locking of particular floors (transponders with different authorisation profiles)

Floors 0, 1 and 2 are open to the public. No access to floors 3 and 4 without corresponding transponder.

Persons with corresponding transponder A (blue) have access to floor 3.

Persons with corresponding transponder B (purple) have access to floor 4.

The system can be modify to client request. You can have badge with controled access to the floors.
